Lightspeed's Rich Breault Appointed to Circuits Assembly Editorial Advisory Board

Methuen, Massachusetts, USA - Rich Breault, President of Lightspeed Manufacturing, a growing EMS provider in northeastern Massachusetts, has been appointed to the Editorial Advisory Board of Circuits Assembly magazine, a UP Media Group publication serving the electronics packaging and assembly industry. Circuits Assembly's Editorial Advisory Board is comprised of experts in electronics manufacturing, and is responsible for reviewing the general editorial direction of Circuits Assembly. The Board provides advice and feedback on technical areas of interest, reviews reader polls, evaluates the magazine's columnists and topics, and prioritizes the technical and topical subjects for the upcoming 12 to 18 months.

“Rich is a well-known and respected presence in electronics manufacturing” Mike Buetow, Circuits Assembly’s Editor-in-Chief, says. “I’m relying on Rich to provide insights into component repair and the small businessman’s perspective that is often missing in many industry publications.”

Other members of Circuits Assembly’s Editorial Advisory Board for 2006 are John D. Borneman of Delphi Delco Electronics, Chrys Shea of Cookson Electronics, and Sue Mucha of Powell-Mucha Consulting.

Breault founded Lightspeed Manufacturing in 2003. His previous enterprise, NETCO Automation, was known for its expertise in BGA services and prototype development. Breault currently serves as President of the Boston (Massachusetts) Chapter of the Surface Mount Technology Association (SMTA).
